DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 12-15 and 23-26, drawn to a method/system/computer readable media for providing data to a client computer, classified in class 705, subclass 52.
- II. Claims 5-9, 16-20 and 27-31, drawn to a method/system/computer readable media for controlling access to data on a computer, classified in class 705, subclass 76.
- III. Claims 10-11, 21-22 and 32-33, drawn to a method/system/computer readable media for obtaining service from a secure data server, classified in class 705, subclass 64.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as providing data to a client computer. Invention II has separate utility such as controlling access to data on a computer. Invention III has separate utility such as obtaining service from a secure server. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
